

PROJECT REFERENCE

AUTOMATION SYSTEM

We have over a decade of experience in designing and implementing automation system.

บริษัทมีความชำนาญและเชี่ยวชาญในการออกแบบระบบควบคุมอัตโนมัติ งานออกแบบเขียนโปรแกรมควบคุมเครื่องจักร งานประกอบตู้คอนโทรลและงานติดตั้ง

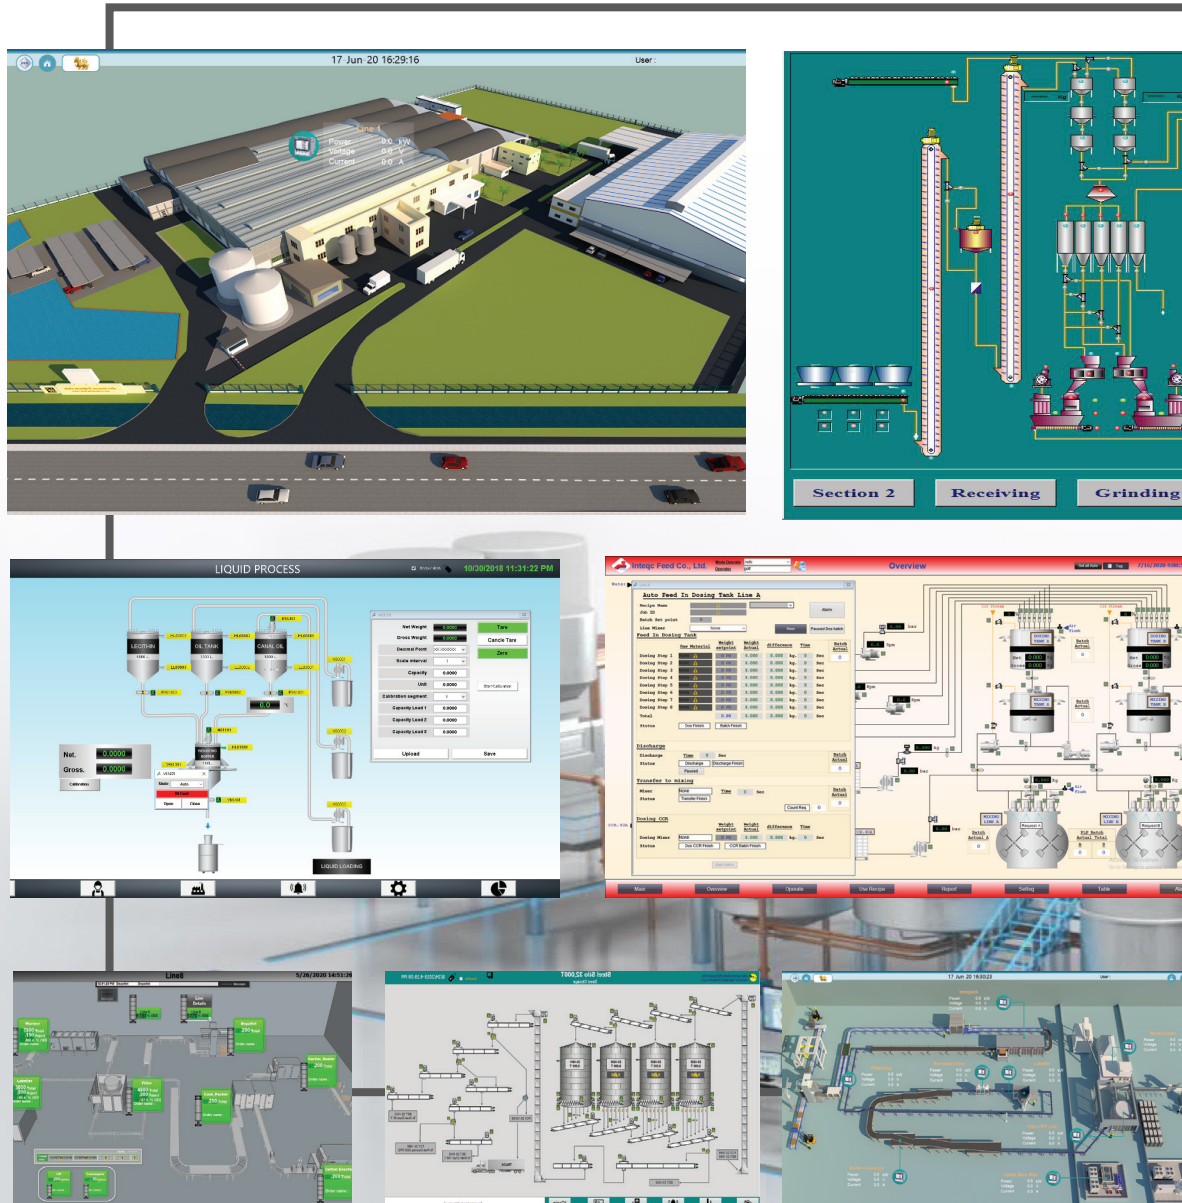

PLC Automation Control

Electrical Control panel assembly

Supervisory control and data acquisition

PLC Automation Control

P.A.M. company designs the PLC programs to meet the customer's requirement for both hardware and software.

บริษัท P.A.M. รับออกแบบเขียนโปรแกรม PLC ที่ตอบสนองต่อความต้องการของลูกค้าทั้ง hardware และ Software

CPU S7-1200

CPU S7-1500

CPU S7-400

Reduced engineering times

Fast commissioning

Short downtimes

Investment security

Electrical Control Panel Assembly

Assemble the control cabinet and Upgrade control cabinet

ประกอบตู้คอนโทรล และ
รับอัพเกรดตู้คอนโทรล

SCADA

Supervisory Control and Data Acquisition

Efficiency

As key to increased productivity, SIMATIC WinCC V7 combines efficient engineering with powerful archiving and maximum data security. It serves as the basis for efficient operations control and intelligent production analysis

Scalability

We offer stationary or mobile solutions for increasing requirements with guaranteed safety. For this purpose, we use our SCADA know-how of more than 15 years across all sectors. No matter how moderate or expansive your requests – we provide the suitable solution.

Innovation

Benefit from information provision anytime and anywhere with mobile SCADA solutions – also with available tablet or smart-phone hardware. The application of multitouch gestures in industrial environments opens the door to modern operating concepts.

Openness

Thanks to the support of international standards as well as native script and programming interfaces, also special requests can be easily realized.
